

## Quartz Commences Trading on the OTCQB Market Under the Symbol QZMRF

**August 20, 2025 – Vancouver, British Columbia** – Quartz Mountain Resources Ltd. (TSXV: QZM) (“Quartz” or the “Company”) is pleased to announce that its common shares have been uplisted from the OTC Pink market to the OTCQB® Venture Market (“OTCQB”) in the United States. The Company’s shares are now trading on the OTCQB under the symbol “QZMRF”, while Quartz will continue to maintain its primary listing on the TSX Venture Exchange under the symbol “QZM.”

*Bob Dickinson, Quartz’s Chairman comments, “As we effectively advance our work at the Prodigy gold-silver discovery on our Maestro Property in Central British Columbia, our listing on the OTCQB marks a timely and strategic milestone. Rising investor interest in precious and base metals, and associated equities, has generated increased attention from U.S. investors. Trading on the OTCQB will enhance liquidity by providing current and future U.S.-based investors with a more transparent trading platform, while increasing the Company’s visibility and access for U.S. investors. The OTCQB offers an efficient platform for Quartz to access the world’s largest pool of equity capital and further strengthen its capital markets strategy.”*

Shareholders of existing U.S. listed Quartz Mountain shares that were previously traded on the OTC Pink Open Market will now trade on the OTCQB with **no further action required by shareholders**.

Information relating to Quartz as well as real-time price quotes is available on [www.otcm Markets.com](http://www.otcm Markets.com). The OTCQB, operated by the OTC Markets Group Inc., is the premier marketplace for entrepreneurial and development stage companies that are committed to providing a high-quality trading and information experience for their US investors. To be eligible, companies must be current in their financial reporting and undergo an annual company verification and management certification process. The OTCQB quality standards provide a strong baseline of transparency, as well as the technology and regulation to improve the information and trading experience for investors.

The Company also reports that its Phase 3 diamond drilling program at its Prodigy gold and silver discovery located within its Maestro Property in central British Columbia is ongoing with over 2,500 metres of drilling in five core holes now completed (see Quartz news release dated August 11, 2025). A total of seven holes will be drilled as part of this program, which is expected to bring the total number of metres in this phase to approximately 3,700 metres. Assay results from all seven Phase 3 drill holes (PR25-07 through PR25-13) will be announced as soon as they are received and compiled by Quartz. Additional sequential phases of drilling are planned during the remainder of 2025.

### About Quartz

Headquartered in Vancouver, Canada, Quartz Mountain Resources (TSXV:QZM, QTCQB:QZMRF) is a well-funded public company whose successful mine-finding management team is focused on discovering and transacting important-scale gold, silver and copper projects in British Columbia. The Company owns 100% of the Maestro high grade gold-silver project and 100% of the Jake porphyry copper-gold-silver project. Both projects are

permitted by the British Columbia government for drilling activities with access to infrastructure and high potential for the development of substantial resources for significant future transactions.

Quartz is associated with Hunter Dickinson Inc. (HDI), a company with over 35 years of successfully discovering, developing and transacting mineral projects in Canada and internationally. Former HDI projects in British Columbia included Mount Milligan, Kemess South and Gibraltar -- all of which are porphyry-copper±gold deposits with current-producing or former-producing mines. Recently, Amarc Resources, an HDI associate, with funding from Freeport, announced the exciting discovery of the exceptionally high grade, AuRORA gold-copper-porphyry deposit also in British Columbia. Other well-known projects with HDI involvement include Sisson and Prosperity in Canada, Pebble and Florence in the United States, and Xietongmen in China.

Quartz is committed to the advancement of important-scale, critical and essential mining assets while following responsible mineral development principles, including a mandate to employ best-practice approaches in the engagement and involvement of local communities and meeting rigorous environmental standards.

### **About Maestro**

The Maestro Project, located in central British Columbia, lies adjacent to Highway 16, 15 km north of Houston and 45 km south of Smithers, providing year-round road access to the project and nearby infrastructure including, rail, hydroelectricity, and natural gas. Covering 2,309 hectares, it has a rich exploration history dating back to 1914, primarily focusing on the Lone Pine Mo-Cu porphyry deposit and not the precious metals potential of the surrounding area (see Quartz news release March 19<sup>th</sup>, 2024, and NI 43-101 Technical Report and Preliminary Economic Assessment, P&E Mining Consultants Inc., January 21<sup>st</sup>, 2011).

Since acquiring the property, Quartz has conducted comprehensive geochemical and geophysical surveys, including soil/silt sampling, induced polarization geophysics, airborne magnetic surveys, hyperspectral studies, detailed relogging of historical drill core and assaying for gold only, 976 pulp samples derived from historical assaying of numerous core holes located across the Maestro Property. Quartz's first ever drill test, on its Maestro Property, a Phase One, two-hole drill program at the Prodigy Zone, discovered exciting high-grade Au-Ag lodes and Ag-Au veins which are both hosted within an extensive epithermal Au-Ag system. The Au lodes and Ag veins along with the more disseminated precious metals intersected by the drill holes are all hosted within a large and earlier deposited, Mo-Cu porphyry system. Quartz's second core hole, PR-23-02 intersected 102 m grading 2.22 g/t Au and 104 g/t Ag, including 12 m grading 1.23 g/t Au and 586 g/t Ag and also 36 m of 5.73 g/t Au and 87 g/t Ag. Drill results to date indicate high potential for both bulk tonnage and underground high-grade gold and silver mineralization. Delineation type drilling of the new Prodigy discovery at Maestro, is underway. It is expected that drilling at Prodigy will be consistently advanced in multiple stages during 2025. Mineralization remains open in multiple directions and at depth, promising significant further potential.

### **About Jake**

Mineralization at Jake is situated within a prominent rusty coloured gossan measuring 3.5 km long by 1.5 km wide. The combination of extensive historical and recent exploration work has outlined a very expansive altered area at Jake hosting epithermal and porphyry-style sulphide disseminations and veinlets containing Cu-Au-Ag-Zn-Mo and

Re. A series of modern surface exploration programs were first completed by Quartz to build on very compelling historical data on the Property developed by legendary porphyry copper explorers, including Kennco, Canadian Superior, Cities Service, Placer Development and Teck Corp. Taken together this comprehensive technical database defined a significant-scale porphyry copper-gold deposit target which Quartz tested with 3,418 meters of drilling in seven 7 holes during 2024. This maiden drill program successfully discovered a new porphyry copper-gold-silver system, wide open to expansion. Upon discovery, Quartz acquired a 100% interest in mineral tenures over an entire new BC porphyry copper-gold district surrounding the Jake Property. The next milestone towards a transaction will be delineation drilling of the new Jake discovery, currently being planned to commence after successful delineation drilling being conducted at Maestro over 2025.

### Qualified Person

Farshad Shirmohammad, M.Sc., P.Geo., a “Qualified Person” within the meaning of National Instrument 43-101 – Standards of Disclosure for Minerals Projects, who is not independent of Quartz Mountain Resources Ltd., has reviewed and approved the scientific and technical information contained in this news release.
